

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 1-71. Cancelled

72. (Amended) A cosmetic composition for making up lips or skin comprising, in a cosmetically acceptable medium, a dispersion of particles, in a liquid fatty phase, of at least one non-silicone-based grafted ethylenic polymer in comprising an ethylenic skeleton that is insoluble in said at least one liquid fatty phase and side chains, covalently bonded to said skeleton, that are soluble in said at least one liquid fatty phase ~~in a liquid fatty phase~~, wherein said at least one non-silicone-based grafted ethylenic polymer is present in an amount sufficient to render the composition capable of forming a deposit with a transfer index of less than or equal to 35%.

73. (Withdrawn) A composition according to Claim 72, wherein the at least one non-silicone-based grafted polymer comprises at least one carbon-based macromonomer and optionally further comprises up to 7% by weight of at least one silicone-based macromonomer.

74. (Currently Amended) A composition according to Claim 72, wherein the at least one non-silicone-based grafted ethylenic polymer is chosen from acrylic polymers that may be obtained by free-radical polymerization in an organic polymerization medium:

- of at least one acrylic monomer, and optionally of at least one additional non-acrylic vinyl monomer, to form an insoluble in said at least one liquid fatty phase skeleton; and

- of at least one carbon-based macromonomer comprising at least one polymerizable end group to form at least one side chain, the at least one carbon-based macromonomer having a weight-average molecular mass of greater than or equal to 200 and the content of polymerized macromonomer representing from 0.05% to 20% by weight of the polymer.

75. (Previously Presented) A composition according to Claim 74, wherein the at least one acrylic monomer is chosen, alone or as a mixture, from the following monomers, and salts thereof:

-(i) (meth)acrylates of formula:

wherein:

- R₁ is chosen from hydrogen and methyl;
- R₂ is chosen from:
 - linear or branched alkyl groups comprising from 1 to 6 carbons, the said groups possibly comprising in their chains at least one heteroatom chosen from O, N, and S; and possibly comprising at least one substituent chosen from -OR, halogens, and -NR'R'' with R' and R'', which may be identical or different, chosen from linear or

branched C₁-C₄ alkyls; and possibly being substituted with at least one polyoxyalkylene group comprising a repetition of 5 to 30 oxyalkylene units;

- cyclic alkyl groups comprising from 3 to 6 carbons, the said groups possibly comprising in their chains at least one heteroatom chosen from O, N, and S, and possibly comprising at least one substituent chosen from OH and halogens;

-(ii) (meth)acrylamides of formula:

wherein:

- R₃ is chosen from hydrogen and methyl;

- R₄ and R₅, which may be identical or different, are chosen from hydrogen and linear or branched alkyl groups comprising from 1 to 6 carbons, which may comprise at least one substituent chosen from -OR, halogens, and -NR'R'' with R' and R'', which may be identical or different, chosen from linear or branched C₁-C₄ alkyls; or

-R₄ is hydrogen and R₅ is a 1,1-dimethyl-3-oxobutyl group;

-(iii) (meth)acrylic monomers comprising at least one function chosen from carboxylic acids, phosphoric acids, and sulfonic acids.

76. (Previously Presented) A composition according to Claim 74, wherein the at least one acrylic monomer is chosen from methyl acrylate, methoxyethyl acrylate, methyl methacrylate, 2-hydroxyethyl methacrylate, (meth)acrylic acid, and dimethylaminoethyl methacrylate.

77. (Withdrawn) A composition according to Claim 75, wherein (meth)acrylic acid is present in a content of at least 5% by weight, relative to the total weight of the polymer.

78. (Previously Presented) A composition according to Claim 72, wherein the at least one non-silicone-based grafted acrylic polymer may be obtained by free-radical polymerization of at least one acrylic monomer and of at least one additional non-acrylic vinyl monomer and of the carbon based macromonomer.

79. (Previously Presented) A composition according to Claim 74, wherein the at least one acrylic monomer represent from 50% to 100% by weight of the mixture of the at least one acrylic monomers and optional at least one nonacrylic vinyl monomer.

80. (Previously Presented) A composition according to Claim 72, wherein the at least one non-silicone-based carbon-based macromonomer is chosen from:

(i) poly(2-ethylhexyl acrylate) macromonomers comprising a mono(meth)acrylate end group and poly(dodecyl acrylate) macromonomers comprising at least one mono(meth)acrylate end group; poly(dodecyl methacrylate) macromonomers; poly(stearyl acrylate) macromonomers comprising at least one mono(meth)acrylate end group; poly(stearyl methacrylate) macromonomers comprising at least one mono(meth)acrylate end group;

(ii) polyethylene macromonomers, polypropylene macromonomers, macromonomers of polyethylene/polypropylene copolymer, macromonomers of polyethylene/polybutylene copolymer, polyisobutylene macromonomers, polybutadiene macromonomers, polyisoprene macromonomers, polybutadiene macromonomers,

poly(ethylene/butylene)-polyisoprene macromonomers, and the foregoing macromonomers further comprising at least one (meth)acrylate end group.

81. (Previously Presented) A composition according to Claim 72, wherein the non-silicone-based grafted polymer is chosen from polymers obtained by polymerization:

- of methyl acrylate and of at least one polyethylene/polybutylene macromonomer comprising at least one methacrylate end group;
- of methoxyethyl acrylate and of at least one polyethylene/poly-butylene macromonomer comprising at least one methacrylate end group;
- of methyl acrylate/methyl methacrylate monomers and of at least one polyethylene/polybutylene macromonomer comprising at least one methacrylate end group;
- of methyl acrylate/acrylic acid monomers and of at least one polyethylene/polybutylene macromonomer comprising at least one methacrylate end group;
- of methyl acrylate/dimethylaminoethyl methacrylate monomers and of at least one polyethylene/polybutylene macromonomer comprising at least one methacrylate end group;
- of methyl acrylate/2-hydroxyethyl methacrylate monomers and of at least one polyethylene/polybutylene macromonomer comprising at least one methacrylate end group.

82. (Previously Presented) A composition according to Claim 73, wherein the at least one carbon-based macromonomer has a weight-average molecular mass (M_w) ranging from 300 to 100 000.

83. (Previously Presented) A composition according to Claim 73, wherein the at least one carbon-based macromonomer represents from 0.1% to 15% by weight, relative to the total weight of the polymer.

84. (Previously Presented) A composition according to Claim 72, further comprising at least one volatile oil chosen from isododecane, isodecane, and isohexadecane.

85. (Previously Presented) A composition according to Claim 72, further comprising at least one non-volatile oil.

86. (Previously Presented) A composition according to Claim 72, wherein the at least one non-silicone-based grafted ethylenic polymer in a liquid fatty phase consists of at least 50% by weight of at least one non-silicone-based liquid organic compound chosen from:

- non-silicone-based liquid organic compounds with a global solubility parameter according to the Hansen solubility space of less than or equal to $18 \text{ (MPa)}^{1/2}$;
- liquid monoalcohols with a global solubility parameter according to the Hansen solubility space of less than or equal to $20 \text{ (MPa)}^{1/2}$; and
- mixtures thereof.

87. (Previously Presented) A composition according to Claim 72, wherein the at least one non-silicone-based grafted ethylenic polymer has a solids content ranging from 1% to 70% by weight, relative to the total weight of the composition.

88. (Previously Presented) A composition according to Claim 72, further comprising from 0.1% to 50% by weight of waxes relative to the total weight of the composition.

89. (Previously Presented) A composition according to Claim 72, further comprising at least one dyestuff.

90. (Withdrawn) A cosmetic assembly comprising:

a) a container delimiting at least one compartment, the container being closed by a closing member; and

b) a composition placed inside the at least one compartment, the composition comprising, in a cosmetically acceptable medium, a dispersion of particles of at least one non-silicone-based grafted ethylenic polymer in a liquid fatty phase, wherein said at least one non-silicone-based grafted ethylenic polymer is present in an amount sufficient to render the composition capable of forming a deposit with a transfer index of less than or equal to 35%.

91. (Withdrawn) A non-therapeutic cosmetic process for making up or caring for keratin materials comprising the application to the keratin materials, a composition comprising, in a cosmetically acceptable medium, a dispersion of particles of at least one non-silicone-based grafted ethylenic polymer in a liquid fatty phase, wherein said at least one non-silicone-based grafted ethylenic polymer is present in an amount sufficient to render the composition capable of forming a deposit with a transfer index of less than or equal to 35%.
